Sauvignon

### 7. Aria of the Winery

Voice and Duclar: Zigola

FATTORIA CASTELLINA  
MASTERPLANTS

## THE PROJECT

Wine is one of the first co-creations between nature and humans. The vineyard, the sun, the earth, the wind, the rain... Man creates by playing together with the elements and the forces of nature. The result, is a wine that breathes love and life's complexity. Humans and wines are connected through a sacred bond that leads to a reciprocal respect. Therefore we decided to dedicate an ode to them. In line with the passion and attention which are characteristic of our craft's tradition, we have asked Masterplants to create songs, using their sensitivity to co-create music in harmony with plants, to honour Nature.

Inspired by the Music of the Plants© technology, Masterplants developed an electronic device that translates electrical signals of the plant into musical notes, allowing eight plants to play simultaneously. Masterplants attribute different instruments, rhythms and tonalities to plants creating a symphony that is the direct result of the plant's biorhythm. In every song you can magically hear the different characteristics of each vineyard.

Open a bottle and widen your senses for a completely new experience of getting in tune with nature.

PROJECT OF CO-CREATION  
between plants, Fattoria Castellina and Masterplants

## SYMPHONY OF THE VINEYARDS

Wine is one of the first co-creations between nature and humans, as is the Symphony of the Plants. Immerse yourself with all of your senses in the beauty of our wines!

FATTORIA CASTELLINA  
MASTERPLANTS

*Fattoria Castellina in Tuscany where the grapes grow and the wine is produced*

Fattoria Castellina is situated on the Mediterranean slopes of Montalbano, inside the “Barco Reale”, the ancient hunting reserve of the Medici. There’s 110 hectares of terrain, of which 10ha vineyard, 30ha olive grove and 10ha arable land. The remaining area is a forest of oaks, acacia’s, maples and pines that surround the entire property. We gradually renewed the vineyard. Since 2004 we transformed our entire company inspired by the principles of biodynamic agriculture. This path is very rewarding to us, both for the results we obtained for our grapes and wines at the replique montres rolex as well for the new and truer meaning it has given to our work and the possibility of finally a sustainable agricultural future.

Thanks to the technology of MusicofthePlants© it’s possibile to hear your own plants play with the use of devices developed for this purpose, for information, visit: [www.musicoftheplants.com](http://www.musicoftheplants.com)

# HAPPY HOLIDAYS OFFER

Surprise your loved ones, friends, family or clients with an original gift for the holidays or prepare a special party evening with our wines and music. Organising a musical wine tasting event at home or at the office will leave everyone present impressed!
